Personal Health Care is the amount actually spent on patient care							2.35%	less premium tax						
							11.72%	Net Administrative costs						
							14%	\$484.62	5%	\$560.53	4%	\$644.52	7%	\$472.02

According to the US census bureau, at some time during 2005 99.07% of US residents had some form of health insurance

1Detailed estimates are made for these Federal Government programs: Medicare, Workers' Compensation, Medicaid, Department of Defense, Maternal and Child Health, Vocational Rehabilitation, Alcohol, Drug Abuse, and Mental Health Administration, Indian Health Service, State Children's Health Insurance Program, and miscellaneous general hospital and medical programs.

2Detailed estimates are made for these State and Local Government programs: Temporary Disability Program, Workers' Compensation, Medicaid, General Assistance, Maternal and Child Health, Vocational Rehabilitation, hospital subsidies, State Children's Health Insurance Program, and school health.

NOTE: Research and development expenditures of drug companies and other manufacturers and providers of medical equipment and supplies are excluded from research expenditures. These research expenditures are implicitly included in the expenditure class in which the product falls, in that they are covered in the final cost of that product. The figure 0.0 denotes amounts less than \$50 million. Dashes mean that there are no estimates for a source of funds. Numbers may not add to totals because of rounding.
